Selection based on:

Positive Breeding = where a bird has been confirmed as breeding, or there are signs that there is probable breeding.

Date = a date range which represents each species' breeding season, this criteria will be used where breeding has not been confirmed. Please note that this criteria will also bring up non-breeding records which may not be relevant to the data user.

Roost = where a species has been recorded as being in a recognised roost or a winter roost.

All Records = where all records for a species are flagged up.
